RDS receives Merit Award at Hillhead 2007

RDS Technology's Axlog Alpha was recently award a Merit in the Institute of Quarrying and Quarry Products Association's 'Designing for Safety Awards' at the recent Hillhead exhibition.

The Axlog Alpha is an overload warning system designed to help operators avoid gross vehicle weight overloads on any axle and works with either air or leaf spring suspension. This has a two-fold benefit of improving vehicle efficiency thus reducing servicing costs and avoiding overload fines.

Managing Director of RDS, Richard Danby says 'we are very happy to receive this recognition of the part that axle overload warning can play in keeping vehicles safe on the roads. It goes to show that such developments have an important role to play in a wide range of industries and we look forward to products like the Axlog Alpha helping to improve machinery efficiency even further in the future.'

Also on display at Hillhead was the RDS industrial on-board weighing range for wheeled loaders. From entry-level systems to

RDS Technology Ltd - leading on-board machinery electronic technology into the 21st Century
